Profile Summary

Versatile information security graduate from KCA University with a Bachelor of science in Applied Computing with expertise in cybersecurity and data analysis and administrative support. Skilled in safeguarding digital systems through intrusion detection, vulnerability assessment, and cloud security, while leveraging SQL, Python, and advanced visualization tools to transform complex datasets into actionable insights. Known for analytical precision, adaptability across technical and business domains and strong communication skills that bridge technical findings with strategic decision-making. Creative problem solver with excellent communication and leadership skills.

Technical Skills

- Network Security and Intrusion Detection
- Data Cleaning and Wrangling
- Incident Response and Digital Forensics
- IT Governance & Documentation
- Technical Support

Soft Skills

- Problem-Solving and analytical thinking.
- Team Collaboration
- Leadership
- Adaptability

Work Experience

IT Intern, Ecobank Kenya Limited
May 2025 – July 2025

- Resolved hardware, software, and network issues for end-users and banking applications, significantly reducing downtime through proactive troubleshooting and workstation configuration.
- Monitored IT infrastructure performance and assisted in critical system upgrades and server maintenance to ensure a stable and secure operating environment.
- Developed comprehensive user guides and technical documentation while gaining hands-on experience in cybersecurity practices and financial technology compliance.

Administrative intern, Halisi Family Hospital
April 2024- June 2024, July 2023 – September 2023

- Streamlined administrative processes and maintained precise database records, significantly improving service delivery efficiency and inventory procurement
- Partnered with administrative teams to synchronize office workflows and facilitate procurement, fostering a high-performance culture focused on collective results
- Expertly managed senior staff calendars, coordinated meetings, and handled high-volume correspondence
- Provided professional front-desk support and managed sensitive documentation with strict adherence to HIPAA guidelines and hospital confidentiality standards.

Certifications & Training

Future Interns, Ongoing – Data Science and Analytics
CYBER SHUJAA, Ongoing – Data and AI Track
CISCO, December 2025 - Cyber Threat Management
CISCO, March 2024 - Network Technician Career Path
